

Mood + Weather =

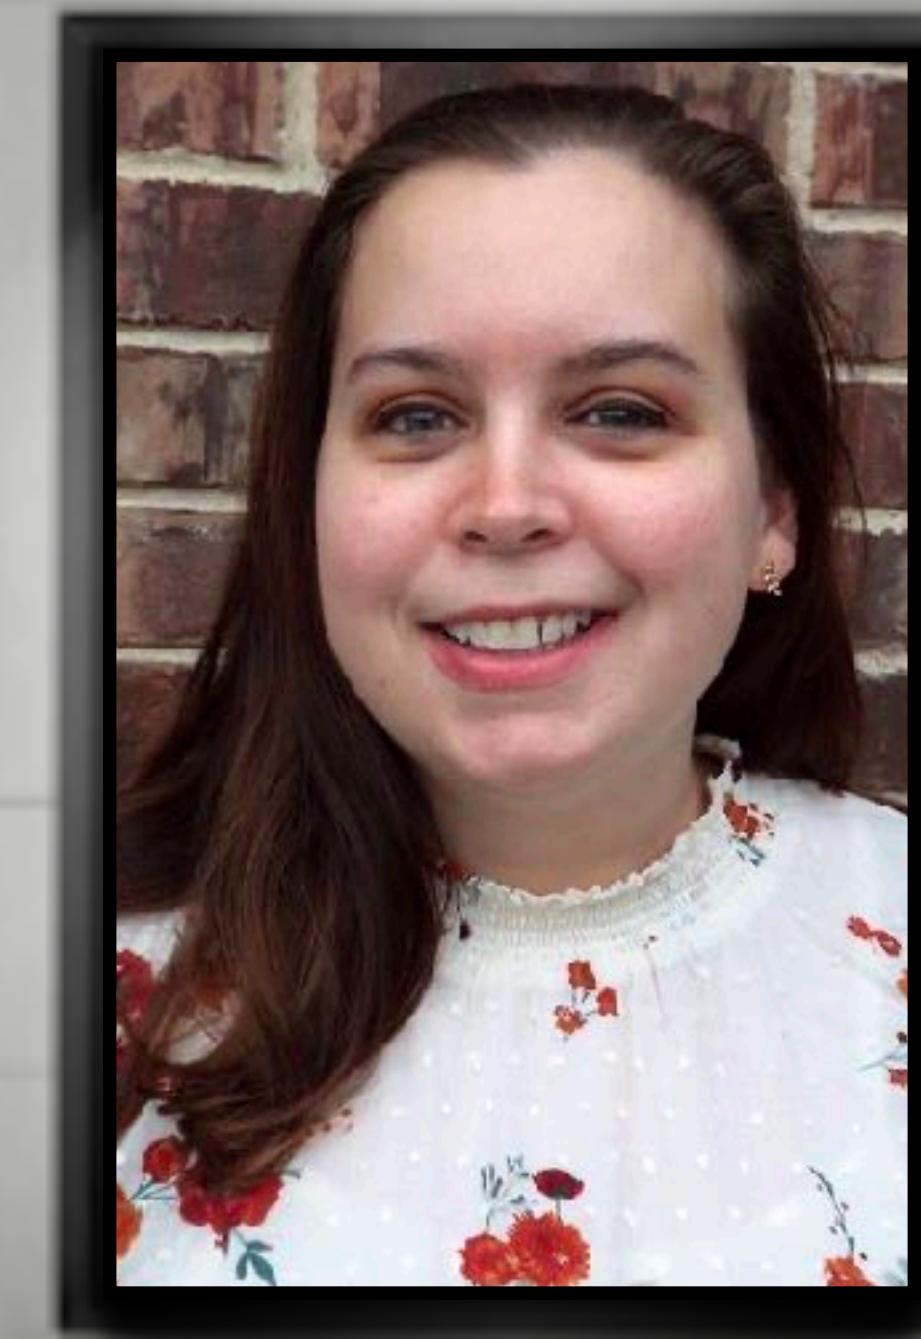

Mood + Weather =

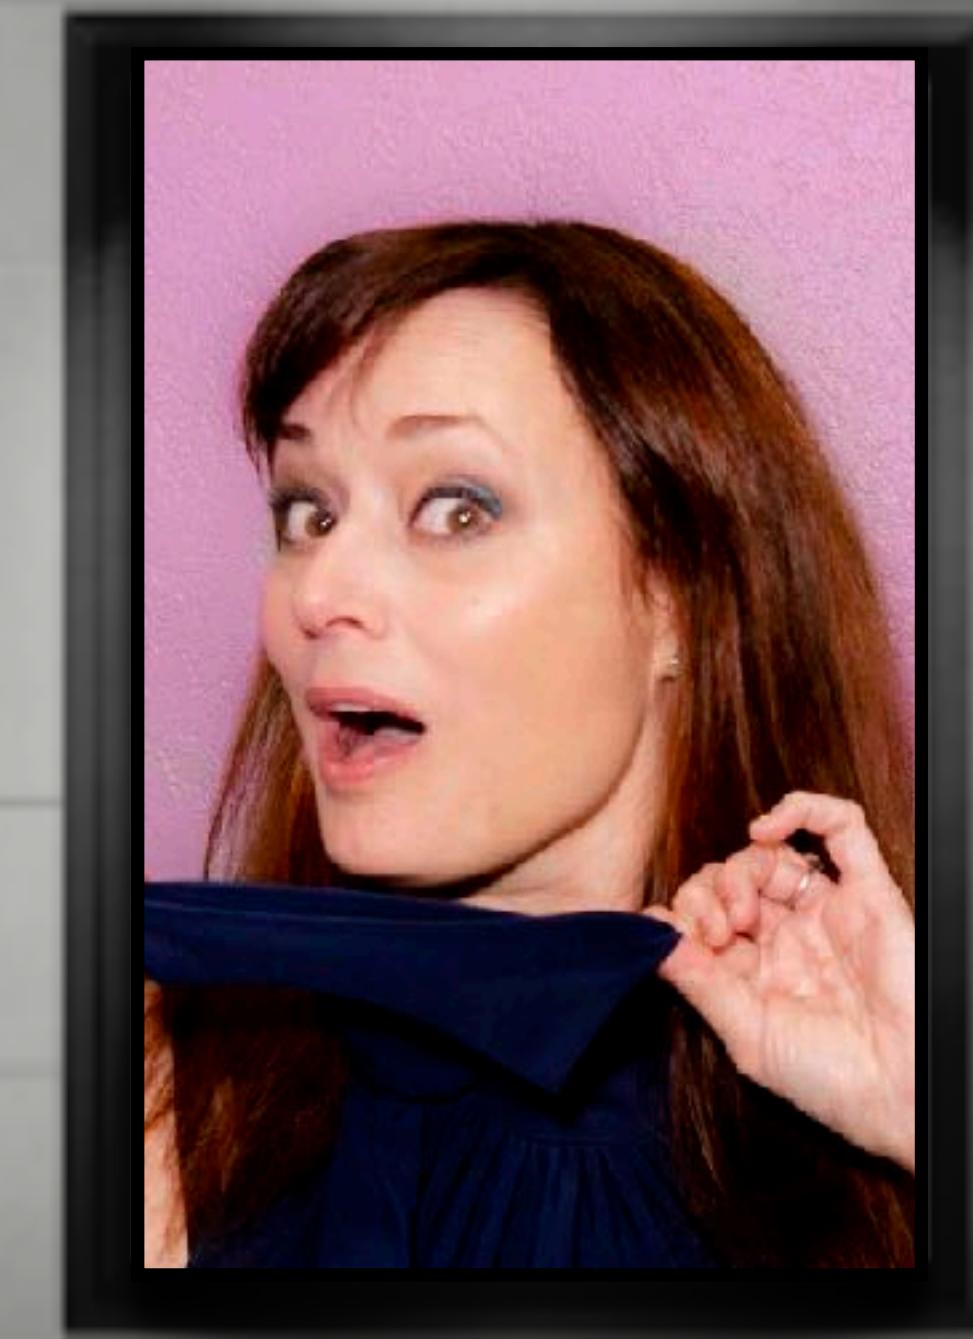

HANK ALDOUS

KATIE DEVINNEY

GIGI TIPTON

# Concept:

Create an app that auto generates movie suggestions based on your mood or the weather using 2 APIs.

Your mood normally determines what you watch. Combine that with the weather for a unique experience.

## Design Process:

Design was simple and clean making the weather and emojis the focus for the app.

Roadblocks hit with Bulma based on the color palette issues.
